M-29 Update- A draft of the Michigan Department of Transportation (MDOT) Bay Region M-29 Corridor Study was reviewed. The purpose of this study was to evaluate roadway improvements along the M-29 corridor to increase pedestrian and bicycle safety, slow traffic and be easily implemented. Specifically reviewed were 4 options for M-29 revisions. Discussion included comparisons of type of parking along Palmer Park, the location or necessity of a bicycle path, possible congestion when the bridge operates and where the location of the 4 to 3 lane change decrease would begin. This was an informative meeting only. There will be public hearings and additional meetings about this topic for further input. Council requested Administration to request MDOT provide more details for concepts 1 and 4. No formal action was taken.

Time did not allow for discussion on Charter Revisions or Signs.
